

# NATURESOFT

## NATURE AT ITS *ULTRA* FINEST

Micro Powders introduces Naturesoft 800 - the natural solution for your color cosmetics and skincare needs.

**UNSURPASSED BINDING | OIL-ABSORBING | FASTER DRY TIME | REDUCED WET/TACKY FEEL**

Micro Powders offers the most comprehensive range of micronized powders for the personal care industry. Naturesoft 800 is an ultrafine white powder that can be used in skincare and color cosmetics to improve sensorial properties that include faster dry time and reduces wet/tacky feel. This 100% natural powder is made from biodegradable cellulose and is IECIC listed for use in China. Naturesoft 800 provides superior binding ability, allowing the formulator more flexibility in creating pressed powders without the use of oil binders. In addition, Naturesoft 800 provides a high level of oil absorption, making this white natural powder a versatile ingredient for the personal care formulator.
