| Phase B | | | |
| BioWhite 50PC | Polyhydroxybutyrate and Titanium Dioxide | 23.00 | Micro Powders, Inc. |
| | Total | 100% | |

Procedure

1. Weigh Phase A ingredients into a beaker. Start heating slowly up to 80-85°C. Start mixing using propeller type blade at slow to medium speed until it is uniform and clear.
2. Slowly add Phase B under medium mixing. Continue to mix until homogeneous. Cool to 60-65°C and drop the batch.
